

1. 确定是否支持SSH

1. linux确定命令：netstat -anp|grep :22

```
tcp        0      0 0.0.0.0:22          0.0.0.0:*          LISTEN      1033/sshd
tcp        0      0 192.168.100.133:22 192.168.224.119:51487 ESTABLISHED 19464/sshd: root@
tcp        0      0 192.168.100.133:22 192.168.210.245:62460 ESTABLISHED 18549/sshd: root@
tcp        0      0 192.168.100.133:22 192.168.100.140:41036 ESTABLISHED 1831/sshd: root@n
tcp6       0      0 :::22              :::*                LISTEN      1033/sshd
```

2. 启动ssh服务的命令：service sshd start

3. 一般都是关闭防火墙：service iptables stop

4. 确定防火墙是否关闭：service iptables status

2. 把linux服务器在Jenkins上注册

1. 新建节点

系统管理->管理节点->新建节点
