

1. Jenkins基础

1. 下载Jenkins

下载地址: jenkins.io

2. 启动Jenkins

用命令 `java -jar Jenkins.war`

3. 安装Jenkins插

两个插件如下：

1. rebuilder: 重新构建，可以方便而且少输入很多参数
2. safe restart: 帮助你安全重启

4. 基础配置

a. 配置全局安全属性

4.1.1 设定角色

The screenshot shows the Jenkins configuration interface. In the left sidebar, '系统管理' (System Management) is highlighted. In the main content area, 'Configure Global Security' is highlighted. Below it, the '安全域' (Security Domain) section shows 'Jenkins专用户户数据库' (Jenkins-specific user database) selected. In the '授权策略' (Authorization Strategy) section, '安全矩阵' (Security Matrix) is highlighted. Below this, a table shows the permissions for 'Anonymous Users' and 'Authenticated Users'.

用户/组	Overall	Credentials	Agent
Anonymous Users	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Authenticated Users	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

4.1.2 自定义用户

系统管理->管理用户
